

Because mudpacks,
seaweed wraps
and little hot rocks
can only do so much.

the skin company

Do for the outside what a day
at the spa does for the inside,
with rejuvenation treatments
at The Skin Company.

welcome

The Skin Company is different. From the moment
you walk through the door, you'll feel like you've
entered a spa—not a doctor's office. And that is purely
by intent. Because this place is all about doing for
your outer self what a spa does for your inner self.

So come in and let us evaluate your needs and
recommend treatments. We'll help you make the
mirror your friend again.

BEAUTY FROM THE OUTSIDE IN™

BOTOX® Cosmetic

A highly effective and simple non-surgical procedure.

- BOTOX Cosmetic smoothes out deep expression lines around the eyebrows and forehead and reshapes the brow to reduce the appearance of dynamic wrinkles. A few tiny injections relax the muscle that forms those lines and last up to four months.

BOTOX Cosmetic has been widely tested and is now the most popular cosmetic procedure in the world.

Juvéderm®

A safe, natural cosmetic dermal filler that restores volume and fullness to the skin.

- Juvéderm provides instant and long-lasting wrinkle correction. A series of injections improves deeply etched lip and laugh lines and makes lips fuller and plumper.

SmartSkin™ Laser

Remove deep wrinkles from your skin and look years younger.

- ➔ This laser system combines two treatments in one. It resurfaces the skin and rejuvenates collagen, virtually eliminating deep wrinkles, photo damage, keratoses and poor skin texture in about 20 minutes.

PhotoFacial

This series of light treatments improves the appearance of rosacea, flushing, sun damage, broken capillaries, age spots, skin texture and photoaging.

- ➔ The treatment also improves mild acne scars, reduces large pores, and improves fine lines and wrinkles. Commonly treated areas include the face, neck, chest, arms, hands and legs.

Lam Probe

This treatment removes skin tags, cholesterol deposits, broken capillaries, milia, and other minor skin abnormalities.

- Using a probe with an electro-current pulse, liquids are drawn to the surface of your skin in order to reduce and fade imperfections.

Light Sheer® Laser Hair Removal

A state-of-the-art laser technology to treat unwanted hair.

- Laser treatment is a non-invasive approach to permanent hair reduction and removal. A series of treatments every four to six weeks is necessary to achieve optimal long-term benefits.

Diamond Tome™ Skin Resurfacing

A diamond-tipped wand gently removes the topmost layer of the skin's surface, leaving it supple, with a smooth radiant glow.

- ➔ This is followed by a full facial treatment designed to meet the needs of your skin. Resurfacing promotes the growth of healthy new cells and improves color, tone and texture.

Customized Medical Facial

Our personalized treatment is designed to address the challenges specific to your skin.

- ➔ This results-oriented facial will stimulate cell turnover, improve circulation and reduce the appearance of fine lines and wrinkles.

Vi Peel™

Our Vi Peel is designed to reverse the signs of aging and sun damage on the skin.

- ➔ Age spots, freckles and hyper-pigmentation will be reduced or eliminated. Your skin will have improved tone, texture and clarity resulting in a more youthful, radiant appearance.

Melanage Peel™

The Melanage Skin Lightening System is a superficial peel designed to improve the texture and appearance of your skin.

- ➔ Generally, patients will see a significant improvement in the appearance of pigmented areas. Dark spots will lighten, complemented by an improved skin texture and tone.

Da Vinci™ Teeth Whitening

Using the most advanced and innovative technology, we whiten your teeth safely and quickly, to achieve maximum results.

- Our special gentle whitening gel contains active ingredients that remove not only surface stains but also the stains found deep inside the teeth. So your teeth get whiter faster and stay whiter longer.
